

CHECK MATE™

ELECTROSTATIC CLEANING SYSTEM

UNPARALLELED
PERFORMANCE.

UNMATCHED
CONVENIENCE.

THE CHALLENGE

Employ an effective and efficient cleaning system that helps reduce the spread of bacteria, mold, and viruses—while also considering the rigorous time constraints typically associated with facility maintenance in high-use educational settings, such as:

- + Classrooms
- + Bathrooms
- + Locker Rooms
- + Cafeterias
- + Gymnasiums
- + Buses

THE SOLUTION

The Check Mate™ Electrostatic Cleaning System from Canberra Corporation. By using the Check Mate suite of products, you can provide rapid, uniform application of fast-acting chemicals to allow for exceptional coverage in a fraction of the time—using chemicals that boast kill times up to 10 times faster than competitive products.

TAKE CHARGE OF A

ELECTROSTATIC CHARGING

When liquids are charged electrostatically, a positive charge is added to each droplet. In the Check Mate System, the charge is added to the droplet as it propels through the sprayer. Like magnets, these droplets are attracted to surfaces—which typically carry a negative charge—and spread out uniformly along that surface. The benefits of an electrostatic sprayer include:

- + Better surface adhesion
- + Uniform coverage, even in hard-to-reach areas
- + Less chemicals required to treat the same surface area
- + Faster application time

65%
LESS CHEMICALS

70%
FASTER APPLICATION

THE CHECK MATE™ ELECTROSTATIC CLEANING SYSTEM

1 CHOOSE YOUR CHEMICAL(S)

Husky® 418 Mold Control

A ready-to-use, EPA registered solution that eliminates and prevents mold on hard and soft surfaces. No PPE is required for this bleach, ammonia and alcohol-free formula. It is colorless and odorless making it ideal for mold clean-up and prevention, disaster restoration and pre-treatment of building materials.

Husky 814 Q/T Tuberculocidal Spray Disinfectant

A ready-to-use, dye-free and lemon fragranced disinfectant cleaner. Effective against 27 organisms in 3 minutes or less (Norovirus in 30 seconds). This Bloodborne Pathogen compliant formula is also EPA approved to kill Hepatitis A and Tuberculosis.

Husky 824 Quick Care Disinfectant

A concentrated, fast-acting disinfectant with no rinse required for most surfaces. This alkaline product sanitizes hard surfaces in 15 seconds, disinfects a wide range of bacteria and viruses in only 3 minutes and can sanitize soft surfaces.

Husky 830 Food Service Sanitizer

Dye and fragrance free, Husky 830 is an EPA-registered, non-ammonia-based sanitizer that comes ready-to-use. Cleans and sanitizes food and non-food contact surfaces, as well as food processing equipment and more with no wipe required.

Husky 892 Arena Plus Disinfectant

A concentrated, neutral pH formula that cleans and disinfects a wide range of bacteria and viruses in only 5 minutes (including Norovirus). Floor to ceiling application without the need to rinse for most surfaces.

BETTER CLEAN.

2 CHARGE IT WITH ELECTROSTATIC CLEANING POWER

The Victory Cordless Electrostatic Sprayer

Lightweight and portable, this 3.8 lb. professional electrostatic sprayer allows you to use less chemical and cover more surfaces in a fraction of the time of conventional sprayers! Cordless and quiet, this versatile sprayer features a 3-in-1 adjustable nozzle for different particle sizes. The 16.8V lithium-ion battery powers the unit for four continuous hours of use on a two-hour charge, and the removable tank holds 33.8 oz. of liquid. Also available in a backpack unit with 2.25 gal. tank for larger facilities.

3 ENJOY THE BENEFITS OF A FASTER, BETTER CLEAN

Uniform Coverage

Using an electrostatic spray system provides uniform coverage on areas that might otherwise be missed or forgotten during cleaning and disinfection.

Economical & Efficient

By applying cleaning solutions electrostatically, you use 65% less chemicals and get a 70% faster application rate!

Convenient Self-Contained Sprayer

Lightweight, portable, and battery-operated, with no cords or concerns for outlet type or location. The system is compact and quiet, making it ideal for use in any environment.
